

METHOD FOR DEVELOPING TESTING PROGRAM OF TESTER

ABSTRACT OF THE DISCLOSURE

A method for automatically developing a testing program of a tester
5 is provided. The method includes steps of establishing an intellectual
property, integrating the intellectual property with a product target
specification, an error code list and a program transfer rule check, and
automatically developing a prototype of the testing program. The
intellectual property includes a tester library, a tester resource installation
10 configuration and a testing strategy.
